

## Miami County

### Estimated Economic Impact of Agriculture, Food, and Food Processing Sectors

5/24/2016

Using the most recent IMPLAN data available (2014) adjusted for 2016, 21 agriculture, food, and food processing sectors were analyzed to determine their overall contribution to the Miami County economy.<sup>1</sup>

These 21 sectors have a total direct output of approximately **\$125.9 million** and support **1,579.5 jobs** in Miami County. Running the model for all 21 sectors simultaneously produces the following results:

Agriculture, Food, and Food Processing Sector Contribution to Overall Economy						
Impact Type <sup>2</sup>	Employment	% Employment	Total Value Added <sup>3</sup>	Total Value Added % of Gross Regional Product <sup>4</sup>	Output <sup>5</sup>	Output % of Gross Regional Product
<b>Direct Effect</b>	1,579.5	14.14%	\$55,190,494.26	7.79%	\$125,875,836.38	17.76%
<b>Indirect Effect</b>	48.9	0.44%	\$4,140,795.90	0.58%	\$7,324,092.39	1.03%
<b>Induced Effect</b>	75.4	0.68%	\$5,750,542.61	0.81%	\$9,656,369.14	1.36%
<b>Total Effect</b>	1,703.9	15.25%	\$65,081,832.77	9.18%	\$142,856,297.91	20.15%

As shown in the above table, agriculture, food, and food processing sectors support **1,703.9 jobs**, or **15.25%** of the entire workforce in the county. These sectors provide a total economic contribution of approximately **\$142.9 million**, roughly **20.15% of the economy**.

Another metric used to calculate the importance of sectors in an economy is their value added as a percentage of GRP. Total value added by the 21 agriculture, food, and food processing sectors is approximately **\$65.1 million**, or **9.18% of the GRP**. This indicates that personal income, business income, and taxes generated by these sectors account for **9.18% of the total economy**.

The following tables document the overall summary numbers of the model, top industries affected by employment and output, and a listing of all industries that were analyzed.

<sup>2</sup> Direct, indirect, and induced effects sum together to estimate the total economic contribution in the state. **Direct effects** capture the contribution from agricultural and food products. **Indirect effects** capture the economic benefit from farms and agricultural businesses purchasing inputs from supporting industries within the state. **Induced effects** capture the benefits created when employees of farms, agricultural businesses, and the supporting industries spend their wages on goods and services within the state.

<sup>3</sup> Value added = labor income + indirect business taxes + other property type income.

<sup>4</sup> GRP = final demand of households + governments expenditures + capital + exports - imports - institutional sales.

<sup>5</sup> Output = intermediate inputs + value added.

All 105 counties in Kansas have an IMPLAN model and an agriculture, food, and food processing contribution summary. These values do not factor in the retail environment of food sales. Food retail is important, but in order to provide the most accurate picture of what production agricultural and processing contributes to Miami County, the retail sector was omitted.
